1   Introduction

This short paper answers some questions aiming at the registration of our team for the
MAPC 2020.

General

1. *What is the name of your team?*
   JaCaMo Builders

2. *Which (agent) platform/programming language(s)/frameworks are you using and
   why?*
   We are using the JaCaMo platform, because it is the most friendly platform for
   most of our team members. Also, one of our goals is to evaluate some features of
   the JaCaMo platform, as well as to use the MAPC as a scenario for the evaluation
   of some final works of students of our team.

3. *Any tips you want to give the other participants?*
   Our main tip for other participants, in particular new participants, is to start devel-
   oping the solution for the scenario as soon as possible to avoid having problems
   with failures/bugs that may happen during the competition.
